Cash Complete

Cash Store Intelligent - CSI

The CashComplete Cash Store Intelligent CSI Smart Deposit Solution improves accuracy, cash visibility and shrinkage protection for a complete transformation of your cash management. The CSI is the ideal solution for businesses where cash volume, security and handling takes up a significant amount of staff and time.

Utilizing SUZOHAPP's proven MFL bill validator, the SDS-35 reduces shrinkage, which is the loss of cash due to hazards such as theft, accounting errors, and accepting counterfeit notes. Integrating the CashComplete™ SDS-35 at the point of sale (POS) will streamline your cash counting process by eliminating unnecessary touchpoints and immediately securing your cash.

- Streamline and automated cash handling

- Reduce loss from theft and shrinkage

- Individual user accountability

- Avoid counting inaccuracies and counterfeit notes

Decrease Shrinkage

Integrating the Cash Store Intelligent into your business will streamline your cash handling process while preventing errors and protecting your business from shrinkage

- Reduce Touchpoints

Fewer handlers in the cash handling cycle decreases the risk of error

- Increased Accountability

Monitor deposits with unique user logins

- Automated Processing

Prevent misreporting your cash inventory by automating the process

- Counterfeit Prevention

Instantly validate every note with the easy 4-way read validator to protect against counterfeits

Upgrade Today

CashComplete™ CSI Note Store Intelligent Solution improves your business with cash management intelligence, allowing you to spend less time handling cash and more time managing your business. The CashComplete™ software provides you the opportunity to receive daily credit from local branches and delay CIT pickups. The CSI is an affordable way to extend intelligent cash management benefits to your business' point of sale operation

RCS 400 Retail Cash Office System

The latest RCS-400 2.0 transforms the cash handling into smart cash management, improving the business at all levels. The minimalistic design together with the latest best-in-class technology and unique software connection, makes the RCS-400 2.0 one of the strongest back office solutions on the market.

The RCS-400 2.0 improves the already very popular RCS-400 coin recycler for back office operations within retail, leisure and public transport. The RCS-400 2.0 works seamlessly with the unique monitoring software solution.

The solution is the ultimate management platform for superior financial and operational control of cash. The cash solution is also connectable to any existing network and can be monitored from any remote position.

- Efficient Cash Handling

High recycling capacity up to 16,000 coins for 8 denominations

- Extream user -Frendliness

The low working height together with light indications make it one of the most user-freindly solutions on the market

- High Security and Storage Capacity

The new overflow box (5,500 coins) increases the total storage of coins up to 21,500

- Flexible Cash Drawer options

IUCD with coin cups or a large tray for big dispense operations. Flexible options of cash drawers to suit customer requirements

Advantages

- Streamlined Cash Handling
- Improved in-store Cash Flow Managment
- Issuing Floats
- High Security of Cash
- Counterfeit Detection
- Easy Reconciliation
- Optimised CIT Deliveries and Pickups
- Shifts, Costs of office and Staff
- High Speed and Accuracy
- Reduce Cash Handling Costs

RCS 800 Retail Cash Office System

After registering on the RCS-800, the cashier selects the cash mix for the day. In less than 30 seconds, coins and notes are automatically dispensed, coins into the cashier's specified cash drawer. Banknotes are dispensed from the note recycling device in parallel, and a receipt is printed.

All activities are registered in the machine's database or sent via the monitoring software to a central server. During the day, the RCS-800 also serves as a continuous cash supplier, enabling a supervisor to support cashiers with change when needed. At the end of the day, the cashier registers at the RCS-800 and quickly deposits coins and notes from the day's takings.

The coins and notes are safely stored in dispensers ready for future float dispensing, the notes can be stored in the recycling device for future float dispense or directly sent to the self sealing transport bag. It has been designed for easy integration with the customer's software systems, such as business or back-office systems. Cheques and coupons can be manually keyed

- Time-consuming manual counting and packaging of coins and notes is eliminated
- Automatic dispensing of the daily floats saves a lot of time
- Self sealing bag for specified note denominations ensures safe and easy handling by back-office/CIT
- Automatic counting of the day's takings per cashier or cash drawer
- Automatic verification of the takings, morning/evening the coins and notes are re-circulated within the store, which means less need for buying cash
- All activities are registered and saved for tracking purposes processing accuracy assured with patented sensor technology

The float is automatically populated in the fill drawer...

Per individual cashier

Maximum cash flow control

Recycling of coins and notes increasing efficiency and staff flexibility

T-FLEX Automatic Coin Dispenser

Simple to install and easy to train employees. Customers have told us that implementing the T-Flex Coin Dispenser can save 5 to 8 seconds on every cash transaction. This means you'll process more customers through the line faster, which leads to increased profits. Because the T-Flex Coin Dispenser automatically calculates the correct change based on commands from the Point of Sale system, cashier errors are a thing of the past.

T-FLEX Coin Dispenser Specifications

Dispenses change in under 2 seconds
 Saves 5 to 8 seconds per transaction
 Serve more customers faster
 Improve speed of service by up to 15%
 Eliminate bottlenecks waiting for change
 Dimensions 368 x 247 x 165 mm
 Weight 11.25lbs (without coin)
 RS232 serial port, USB connectivity
 32 volt DC, 4 amps max
 Power consumption 70W

General Features

- Dispenses 6 coins per second
- Easy reconciliation
- Reduce cashier time by 10 to 15 minutes
- Software tracks change issued
- Fast operation
- Small footprint

Connect Box for scales and Note Counter Intergration

EPoS or Excel

Make your daily cash up easier for your customers with ratiotec Connect. With the integration of the Connect box into your POS-Software you immediately give your customers a vast choice of products that can be integrated for their cash settlement. The tedious and error-prone input of the payroll results manually into the POS system is over. Our modern REST API with the standardized protocols HTTP and SSL allows you to almost integrate all cash counting products with a unique, very manageable workload.

The transfer of cash statements from our money scale and our machines are encrypted via Bluetooth Die-Hellman key exchange, additional the data transport is secured with a 256-bit AES encryption.

- Intergration in only a few hours
- Multiple product intergration
- Professional solution

CTRS2000

T225 Note Counter

CTX 500 Note Counter

General Features

- With just one integration you connect all cash counting devices with your POS system
- Our modern REST API allows a simple and easy integration
- Great comfort for your customers: the count at the cash desk or back office is sent to the POS with a simple push of a button
- Errors due to manual input of data are completely eliminated
- Additional revenue option, can offer your customers an integration of cash counting products with a simple integration.

Forgery Detection CT1189

UV detector lamps

- Powerful 9W UV tube
- Notes/credit cards/driving licences/passports
- Small compact design
- Easy to change tube
- Size: 192 (L) x 80 (D) x 85 (H) mm

Forgery Detection CT1983

- Powerful 12W UV tube
- 6w White light (watermark detection)
- Notes/credit cards/driving licences/passports
- Size: 270 (W) x 140 (D) x 140 (H) mm

SoldiSmart Plus Forgery Detector

Detect Forged UK and Euro Bank Notes

Small, compact and reliable forgery detection unit with a large easy to read LCD display. The unit will automatically count denomination and value of the notes as they pass through the sensor. If any notes are found to be counterfeit, the unit will omit an audible alarm

Product features

- Banknotes can be presented in any direction
- Detection speed of <0.5 seconds per note
- Lithium battery or mains power

Counterfit Detection

- IR - MG -MT - SD

- Update port on reverse

Forgery Detection CT155

Automatic Counterfeit Detector

- Verifies GBP, EUR, CHF, SCT
- Insert currencies in any direction
- 100% tested for GBP (www.bankofengland.co.uk)

Detects Scottish Notes

Forgery Detection CT185

Automatic Counterfeit Detector

- Verifies GBP, EUR, CHF, USD, CAD, MXN, CNY, SCT
- Insert currencies in any direction
- 100% tested for GBP (www.bankofengland.co.uk)

Electronic Forgery Detector

Detect Forged UK, Euro & Scottish Bank Notes

The Cashtec CT155 and the CT185 uses the latest counterfeit detection technology to scrutinize seven advanced security features built into today's currencies: infrared ink, magnetic ink, metallic thread, color, size, thickness and watermark. This technology is so reliable it even detects double notes and half notes. In just half a second, you'll know with 100% certainty whether the banknote in your hand is genuine or counterfeit

Rechargeable battery

- Banknotes can be presented in any direction
- Detection speed of <math><0.5</math> seconds per note
- Lithium battery or mains power
- 2D size detection

Verifies Banknotes through 7 Different Features

- Watermark (WM) - Magnetic (MG) - Metallic Thread (MT) - Infrared (IR) - Colour (CD) - Size - Thickness

Forgery Detector Mini

Magnetic thread and UV

- Metal Thread Detection
- UV Detection
- Portable with Neck Strap
- Notes/Credit Cards/Driving Licence/Passports

Key Ring UV Detector

Compact, light and easy to use UV detection key ring

- 100% accurate
- UV Detection
- Portable with key ring attachment
- Notes/Credit Cards/Driving Licence/Passports

POS check-a-note

Detects Both Paper & Polymer

- Detects Paper & Polymer Notes
- UV Detection
- Easy use
- Long lasting Battery

Handheld UV Detector

Compact, light and easy to use UV detection handheld device

- 100% accurate
- UV Detection
- Detects smartwater and selecta DNA
- Notes/Credit Cards/Driving Licence/Passports

Counterfeit Detector Pen

Effective & Reliable Low Cost Solution

80% of retailers still prefer the simplicity and reliability of a detector pen to the more complex electronic machines

- Low cost effective solution
- Simple to use
- 100% Accurate
- Instant result

Stirling and Euro coin weigher

The MA-NM coin counting scale is ideal for counting large or small bank bags. This machine is portable and covers many applications for checking contents of small and large bank bags for banking or cashing up within the Retail Industry

CTMANM Flatbed Bulk Coin Weigher

- Plate size: 290mm x 220mm
- Dimensions: 345mm x 297mm x 106mm
- Capacity: 8kg x 1g
- Power supply: mains and rechargeable battery
- Programmable units for weight and denomination
- Security password setting function
- LCD display with LED backlight
- Low battery & charging indications
- Overload protection design
- Adjustable feet, bubble level, dust cover

CT 216 Coin Counter

Stirling and Euro Coin Counter/Sorter

A low cost automatic coin sorter and counting machine for lower volumes of UK Sterling coin. (Also available for Euro coins). Mains operated with an LED display showing the total value counted and values for each denomination counted.

CT 216 Coin Counter Specifications

- Counting speed 216 coins/min
- Display type LCD 3 digit batch display
- Batching variables 1 to 999
- Receiving capacity 250 coins
- Power source AC115V

General Features

- Count mixed denomination coin
- Batching 1-999
- Auto stop
- Printer port for external thermal printer

CT209 Coin Counter

Stirling Coin Counter/Sorter

A mid-range automatic coin sorter and counting machine for medium volumes of UK Sterling coin. Mains operated with a LED display showing the total value counted and values for each denomination counted

CT 209 Coin Counter Specifications

- Counting speed 450 coins/min
- Display type LCD 3 digit batch display
- Batching variables 1 to 999
- Receiving capacity 300 coins
- Power source AC115V

General Features

- Count mixed denomination coin
- Batching 1-999
- Auto stop
- Printer port for external thermal printer

Coin Sorter Mach 6

With optional WAVE coin authentication

The Mach 6 is a fast, compact coin sorter/counter configurable for tabletop or higher volume applications requiring bagging capability. Mach 6 is the perfect solution for medium size bank branches, retailers, transportation authorities and even casino operations. Highly configurable, Mach 6 can track and consolidate management information, eliminating the need for manual reporting

Mach 6 Specifications

- Up to 3000 coins per minute
- Pre-set batching
- Management information control
- Counterfeit coin option
- Selectable bag stops
- 2 line alpha-numeric display

Coin Sorter Mach 3

Coin sorter/counter/packager

The Mach 3 is a versatile, cost efficient compact coin sorter that simplifies and speeds coin processing for any business that counts, sorts or packages coin by hand

Mach 3 Specifications

- Up to 1500 coins per minute
- Pre-set batching
- Bagging function
- Continuous sorting
- PC connectivity
- Heavy duty chassis design

Coin Sorter Mach 9 and 12

High speed coin processing for high volume applications

The Mach 9 is a high speed coin sorter applicable to high volume processing centres where throughput and reliability is paramount. Mach 9 is the perfect solution for financial processing centres, vending and transport companies and gaming houses. Highly configurable, Mach 9 can track and consolidate management information eliminating the need for manual reporting. Optional coin authentication provides another layer of security and precise count assurance

Mach 9 Specifications

- Up to 4,500 coins per minute
- Pre-set batching
- Management information control
- Counterfeit coin option

Talaris Technology

Talaris' unique technology sets new industry standards

WAVE™

coin authentication technology

Provides highest accuracy coin counting

WAVE Detection

Coin authentication technology

With the addition of patented WAVE coin authentication option, the Mach 9 becomes the ideal machine to assist in the rejection of intrusive or counterfeit coins. Coin detection increases accountability while maintaining the highest degree of accuracy

Efficient

The standard management information control system (MICS) provides three levels of memory and allows other media - such as cheques, vouchers or bulk coin to be entered via keypad. Notes can be entered manually or automatically transferred if note counter is interfaced, ensuring a comprehensive audit trail

Ease of Use

An easy to read LCD graphic display provides clear function status and operational messages. Selectable bag stops, batch, sub, grand totals are easily accessed via the direct keypad. Full enable easy and quick data entry. Patented quick release bag attachments make it easier and faster for operators to remove and replace bags as they fill

Unmatched Throughput

Throughput is the truest measure of productivity and can only be achieved when a coin counter runs uninterrupted. The Mach 9's patented sorting system ensures trouble free operation and unrivalled performance

Thoughtful Design

The Mach 9 was designed specifically for high volume applications. Its ergonomic design is both functional and aesthetically pleasing. Keypad and printer are easy to reach yet out of the way of heavy coin bags. There's a place to store pens, pencils, and clips and even a dedicated space to rest coin bags

Coin Sorter DTC9

With optional WAVE coin authentication

The latest DTC solution is designed to satisfy the market's need for reliable and modern cash processing. It is a strong performer in sorting and counting, as well as in rejecting foreign and damaged coins. Through the unique sensor technology the solution offers outstanding accuracy, combined with reliable functions. Maximise the efficiency at the same time as you increase the accuracy, enabling you to focus on more profitable tasks. The solution has the latest features such as a touch-screen display and a keypad for easy operation. This, together with the proven sensor technology and the reliable construction, ensures years of operating excellence.

CTDTC9 Coin Sorter Specifications

- Can be equipped with bag holder
- Touch screen display
